		We had an original concrete slab patio that was 10 ft by 10 ft. We poured an extension to that slab of 9 ft by 10 ft and then erected a Shed Roof and Screen structure on top of that slab. 2 support posts are mounted on top of the original concrete slab via metal brackets and the other 2 support posts are imbedded in the new concrete slab that was poured. The structure is made of lumber and is covered by a shed style roof. There is a fan/light in the ceiling which is wired to an exterior outlet and has a switch to turn on and off. Once this permitting/inspection process is complete, all exterior wood will be
